Tools: Git, VS Code, Visual Studio, Figma, Claude Code, Google Tag Manager, GA4, Google Ads
Soft Skills: Clear communication with clients, sales and technical teams; proactive problem solving; fast learning; adaptability; time management

PROFESSIONAL EXPERIENCE

Software Developer — **NGN Costa Rica** | *Feb 2026 – Oct 2026*
Telecommunications company (IP telephony, enterprise networking, video surveillance).

- Built an electronic invoicing platform (Node.js, Express, Prisma, PostgreSQL) integrated with the Zoho Mail API, with a leads module and audit logging.
- Developed and maintained the company website in Astro, reaching 100/100 on Google PageSpeed.
- Designed AI-assisted lead-generation workflows (Python web scraping and LLM pipelines) that turned manual prospecting into repeatable processes.
- Managed Google Ads campaigns with GTM and GA4 integrations, automated recurring reporting with AI agents, and planned content strategy for the company's social page (~10,000 followers).
- Worked across software development, digital marketing and B2B sales support.

Founder & Freelance Web Developer — **NORA Studio** | *Ongoing*

- Design and build responsive websites for small businesses in Costa Rica with HTML, CSS and JavaScript, improving performance and SEO structure.
- Handle client requirements, quotes and delivery directly with business owners.

RPA Development Intern — **Eagle Understanding** | *Sep 2025 – Dec 2025*

- Built UiPath Studio automation workflows to streamline business processes, adding exception handling and logging to improve stability.

IT Support Intern — **All In Tec** | *2024*

- Provided remote and on-site support for Windows systems: troubleshooting and software installation and maintenance.

PROJECTS

VirtualBet — Full-stack virtual casino and sportsbook *(virtual currency only)*

- Designed and built the platform end to end with Node.js, Express, Prisma and PostgreSQL (Supabase), deployed on Vercel and Render.
- Implemented a virtual currency system, six casino games (Crash, Mines, Blackjack, Keno, Plinko, CoinFlip), a sportsbook module using the TheSportsDB API, and P2P/social features.

NGN Coverage Designer — WiFi and camera coverage simulator

- Built and deployed a web application to simulate and plan WiFi and video-surveillance coverage for sales and installation work.

NORA — Full e-commerce store

- Built an online fashion store with Node.js, Express, PostgreSQL and Prisma, including the Tilopay payment gateway, an admin panel and self-managed VPS hosting.

EDUCATION

B.S. in Software Development (in progress) — Universidad Fidélitas | *2026 – Present*
Technical Diploma in Web Development — Colegio Técnico Profesional de Educación Comercial y Servicios | *2023 – 2025*
